Message from the Chairman

For the year ended on 30th June 2017

“Bismillah Hir Rahmanir Rahim”

Distinguished Shareholders

Assalamu Alaikum

Once again, we are gathered here by the Grace of Almighty Allah to share our views on your company's affairs in this Annual General Meeting. Please accept my warm welcome!

Considering industry life cycle, the present day RMG industry has gone past its growth-phase and entered into the maturity-phase and only awaiting to pass on to the declining-phase. While in the growth-phase an industry enjoys high growth rate, in the maturity phase it experiences static demand. The recent EPBs data support this phenomenon.

The RMG industry experienced an erosion of its competitive advantage through the decline in the unit sale price in one hand and increases in cost (increase the wages, gas and other utilities) on the other. The cost-push could not have been absorbed due to the lack of concurrent increase in productivity, and product/market diversification. Your company is relentlessly putting efforts to enhance productivity and diversification and, so far, have achieved mixed results.

On issues of compliance of Accord standards, the management has adopted measures to mitigate the few issues raised as CAP (corrective actions plan) covering fire, electrical and infrastructural safety. Safety occupies a paramount position in the policy frame of your company. So far, by the grace Almighty, we have made considerable progress in terms of fire and electrical safety, while the CAPs on structural aspects are ongoing. The process is time-consuming; because the production and operations have to be kept intact while the corrective actions are being implemented.

The production of the company suffered significantly due to shortage and/or low pressure of gas. However, due to increase in gas pressure in the recent months the loss of production eased up. Besides we have added of new machinery, which has enhanced the quality of the products.

While we are taking all measures to enhance growth and sustainability, the macro economic factors, among others, such as time-based wages structure determined by minimum wage board and increasing trend of utility costs continue to erode our competitiveness. While we recognize the need and importance of enhanced take-home pay for the workers, the time based pay does not facilitate organizational sustainability to offer higher wages and thereby without loss of competitiveness. The Introduction of production/performance based pay structure in place of time-based pay structure may result in a win-win situation. BKMEA, BGMEA can play a vital role in setting up the standards needed for performance-based pay. Standards such as 'General Sewing Data' (GSD) stand as corner stone for performance based pay structure.

As per the Provision of the Articles of the company, I have the pleasure to present before you the Directors Report, the Audited Financial Statements of the company for the year ended 30th June 2017, along with the report of the auditors for your consideration.

Finally, the Board offers its sincere thanks to the workers, professionals, whom the management considers as the most valuable asset of the company, and hopes that they will continue to keep the spirit of teamwork in the coming years for the smooth growth of the company.

With best wishes for the time ahead

Professor Dr. Muhammad Abdul Moyeen
Chairman

Business Risk Perception

H.R. Textile Mills Limited has been operating under the same management for last three decades and during this period the company has gained significant franchise value in the market. The buyers, suppliers and the financial institution has been showing substantial interest and offering comparatively low interest rate and interested to offer financial assistance if required. Although H.R. Textiles is company established long before, it has been updating its system equipment and procedures every year. Technologically H.R. Textile is one of the most advanced composite knit manufacturing company and maintaining close liaison with the buyers. The Owner-Directors are directly looking after the business. Therefore there is no significant business risk in running the company.

Political Risk

The Directors of the company are not involved with any political activities. Therefore, the company in no way, has the chance to face problem for political reasons. However, the risk may arise from general political strikes, blockage of road for shipment, workers strike etc.

Going Concern Risk

H.R. Textile Mills Ltd has been operating as a sustainable organization since 1984. The sponsors always decide on operational and financial issues from the perspective of going concern. Having its own land, building and infrastructure, the company has been operating in such an industry, which is a basic requirement of human being that the management does not see any risk of continuance of the company as a going concern.

Operational Risk

Operational risk arises from internal management, systems failure, maintenance product of quality etc. The company, over a period of time, has developed human resources, systems and procedures, equipped with production facilities with modern technology. With the above facilities, the company is now operating as a quality producer with high franchise value. It has developed a pool of quality human resources who are capable to undertake any type of export orders relating to knit garments. Therefore, the management does not foresee any significant operational risk.

Foreign Exchange Fluctuation Risk

As an exporter H.R. Textile Mills Limited, earns its revenue in US dollars, and imports its major raw materials using the same dollars, as a result there is no foreign exchange fluctuation risk. But, it must be mentioned here that, Bangladesh Taka has become stronger against US dollars, we are getting less Bangladesh Taka while encasing the dollars, to meet our everyday needs.

Market Risk

RMG export market is still volatile. Since the export market of the company is mainly in Europe and our exports are the low cost essential products and with the increasing trend of labour cost, in the Chinese market, Bangladesh is likely to be a beneficiary. However, the wage cost in Bangladesh is also increasing. In order to keep the cost at minimum, the company has been trying to increase the efficiency of the workers. Therefore, although there are market risks, to some extent, the management does not consider it to be very significant.

Compliance Risk

The compliance requirement is becoming more strict now a days and more compliance requirements are forthcoming. The management of the company has been constantly keeping eye to remain compliant always and taking required measures to comply with the buyer's requirements.

Interest rate risk

The interest rate of the banks and financial institutions are still quite high at present. The company management has been trying to use low cost funding to keep the financial service cost as low as possible.

Dividend

During the year under report, the company earned profit after tax of Tk. 36,286,448. Out of the above the Board recommended a cash dividend of Tk. 1.00 (i.e. 10%) per share of Tk. 10 against 10% cash dividend per share of Tk. 10 in the last year. The above would require a cash outflow of Tk. 25.30 million. The balance amount of Tk. 10.99 million of un-appropriated profits will be used to meet the working capital requirement of the company as well to finance the developmental works.

Annexure - A
